

MANAGED SERVICES

GraceBlood has met the current demand for cloud based solutions with our Managed Services platform, the "set & forget" solution for your growing business!

- ✓ **Simplistic:** Easy-to-understand fixed-fees for new partners & documents, plus a monthly subscription based on your transactional volume with subscription billing that only begins **AFTER YOUR PROJECT IS COMPLETE**
- ✓ **End-to-End:** We test with your trading partners, and we test with your ERP, so you have peace of mind that each end of the transaction flows smoothly
- ✓ **Tailored:** Not all ERPs are created equal, so if needed, we'll utilize database lookups to ensure data flowing between you & your trading partners has a high level of integrity
- ✓ **Flexible:** Our platform is capable of any-to-any translations, as well as mixed-mode communications (EDI on one end, API on the other). Say "yes" to all your trading partners' questions!
- ✓ **Analytics:** Our available EDI dashboard tool, Syncrofy, provides visibility into EDI data for the non-EDI person, including actionable-insights into your team's order fulfillment performance

SCALABLE SOLUTIONS THAT GROW WITH YOU

- Shared or exclusive dedicated host
- Flexible pricing and billing options
- Fixed price for new partners, maps and testing
- 24x7x365 worry-free monitoring & exception handling

FULLY MANAGED

With your customized EDI solution in place, your digital supply chain will be handled with excellence, expertise, and efficiency.

CLOUD BASED

Cloud based EDI solutions are an incredible asset to your business. You focus on your business while we handle the transformation & transport of data between you and your supply chain.

MITIGATED RISK

We effectively become your EDI department. We solve any issues and changes before they impact your supply chain.

REAL-TIME VISIBILITY

Customizable self-service dashboards and reports allow you to see all of your data in a searchable easy-to-read format, without draining IT resources.
