

VAN CONNECTIVITY

Our battle-tested systems, with over **400,000 global trading relationships**, have the proven scalability & service levels you expect from a contemporary VAN in today's market.

- ✓ All the reliability, simplicity and forward thinking you need in one stable and secure provider.
- ✓ Between our open Web Service APIs, fully cloud-enabled architecture and our rock-solid stable of legacy connectivity options, we are ready to enable your downstream customers and suppliers with a single platform you can all rely on.
- ✓ Worry-free AS2, so you never have to touch a certificate again.
- ✓ Cloud-based architecture for maximum availability - 99.995% uptime over the last 5 years.
- ✓ Integrated system-level monitoring, real-time dashboards and alerts, including automatic error communication.

ECGRID KEY BENEFITS

- Consolidate connections
- Managed AS2
- No mailbox or archiving fees
- Web services API for deep integration and reporting

BEYOND EDI

In addition to X12, EDIFACT and Tradacoms, easily and instantly route non-EDI document formats such as JSON, XML, CSV, TXT , etc.

EXTENDED ARCHIVING

Unlike most VANs that keep a year of data, ECGrid keeps a 7-year archive, so you can access your data quickly, when you need it.

UNMATCHED SUPPORT

Support available via online chat, email, ticketing system, knowledge base, FAQ and phone.

VENDOR PORTAL

Managed your own VAN communications via the self-service Vendor Community Onboarding Portal.
